BISRAT AMARE

Full-Stack Software Engineer

PROFESSIONAL SUMMARY

Healthcare Tech, Mobile & Backend Systems

Experienced Full-Stack Software Engineer with 5+ years building enterprise-grade digital platforms. Specialized in React.js frontends, Node.js/Express backends, and Flutter mobile apps. Currently architecting Ethio Referral Linkage — a national healthcare platform for patient referral management, hospital-to-hospital communication, and real-time emergency routing. Passionate about clean code, scalable architecture, and solving high-impact real-world problems through technology.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer | Freelance/Remote
2022 – Present

- Architect and build enterprise web applications using React.js, Node.js, and PostgreSQL.
- Leading development of Ethio Referral Linkage healthcare platform for national deployment.
- Deliver REST API integrations, real-time features with Socket.io, and admin dashboards.
- Mentor junior developers and lead code review processes across distributed teams.

Full-Stack Engineer | Software Development Company
2020 – 2022

- Built and maintained React.js frontends and Node.js/Express backend services.
- Developed cross-platform Flutter mobile apps with Firebase for 3 client products.
- Implemented JWT/OAuth authentication systems with role-based access control.
- Optimized PostgreSQL queries achieving 60% performance improvements on large datasets.

Junior Software Developer | Tech Startup, Addis Ababa
2019 – 2020

- Contributed to frontend development using React.js and JavaScript.
- Assisted in building RESTful APIs with Node.js and MongoDB.

- Participated in agile sprints and daily standups with cross-functional teams.

KEY PROJECTS

Ethio Referral Linkage

(In Progress)

National healthcare platform: patient referral mgmt, hospital communication, specialist assignment, emergency routing, analytics dashboard, real-time notifications.

Tech Stack: React.js, Node.js, PostgreSQL, Socket.io, Express, JWT

Enterprise Admin Dashboard

(Completed)

Role-based analytics dashboard with real-time data visualization, user management, and customizable reporting modules.

Tech Stack: React, TypeScript, Recharts, Supabase

Flutter Healthcare App

(Completed)

Cross-platform mobile application for patient health tracking with Firebase backend, push notifications, and offline sync.

Tech Stack: Flutter, Firebase, Dart, Firestore

Secure Auth API System

(Completed)

Production-ready auth system with JWT refresh tokens, OAuth2 (Google/GitHub), RBAC, and rate limiting.

Tech Stack: Node.js, Express, MongoDB, JWT, OAuth2

EDUCATION

Bachelor of Science, Software Engineering

2013 – 2019

Addis Ababa University, Ethiopia
